PROJECTS

Restaurant Table Booking System

Tech Stack: React.js, FastAPI, Supabase (PostgreSQL)

Goal: Reduce booking time and improve reservation efficiency.

- Real-time table availability.
- Quick online reservations.
- Secure booking management.

Built My Cybersecurity Simulation Tool – CyberSec EduSuite

Tech Stack: Python

Goal: Provide a safe platform to learn cybersecurity concepts

- Built a Linux-based tool to simulate **basic cybersecurity scenarios like phishing , SQL injection , network scanning, and password-cracking demonstrations**.
- Used **Kali Linux, Wireshark, and Nmap** for demonstrating security concepts.

SKILLS

Technical Skills

- **Programming Languages:** Java, C, Python, Mysql
- **Frontend:** HTML, CSS, Javascript, React.js
- **Backend:** Node.js ,Fastapi,Supabase(Still learning backend)
- **Cybersecurity Tools :**Kali linux ,Wireshark, Nmap,
- **Tools:** VS Code, Git, Github, Antigravity

Non technical Skills

- Problem Solving
- Communication
- Teamwork

CERTIFICATES

- Internship Completion Full stack development 
- COFPS - Certification 
- Cyber Hygiene Practice - Appreciation Letter 
- Guvi certification - Ethical Hacking 

LANGUAGES
