

VIGNESH M

Cybersecurity Engineer & Full Stack Developer & GenAI Learner

✉ vigneshdevi22@gmail.com  Vignesh M  Vignesh778  Portfolio ☎ 6374340277 📍 Chennai, India

PROFILE

Computer Science Engineering student passionate about **Cybersecurity, Generative AI, and Full-Stack Web Development**. Skilled in Java, C, Python, HTML, CSS, JavaScript, React.js, and **Generative AI** concepts. Eager to apply technical skills, build innovative solutions, and gain industry experience through internships.

EDUCATION

Bachelor of Computer Science Engineering(Cyber Security) 2023 – 2027

Prince Dr. K. Vasudevan College of Engineering and Technology. CGPA: 9.14

SSLC (Class - X) 2020 – 2021

Govt Higher secondary school Vellimedupettai. Score : 100%

HSC (Class - XII) 2022 – 2023

Govt Higher secondary school Vellimedupettai. Score : 77%

INTERNSHIP EXPERIENCE

Full Stack Web Development Intern 02/06/2025 – 02/07/2025 | Tambaram, Chennai

Adventure Technology Solutions Pvt Ltd 

- Assisted in developing web applications using **HTML, CSS, JavaScript, and React.js**.
- Worked on both front-end and back-end development tasks.
- Gained practical experience in web development and application integration.

PROJECTS

Restaurant Table Booking System 

Tech Stack: React.js, FastAPI, Supabase (PostgreSQL)

Goal: Reduce booking time and improve reservation efficiency.

- Real-Time Table Availability:** Users can instantly view available tables and make informed booking decisions.
- Quick Online Reservations:** Provides a simple and fast way for users to reserve tables online.
- Secure Booking Management:** Ensures reservation details are securely stored and efficiently managed.

Built a Hands-On Cybersecurity Simulation Platform – CyberSec EduSuite 

Tech Stack: Python

Goal: Provide a safe platform to learn cybersecurity concepts

- Built a Linux-based tool to simulate basic cybersecurity scenarios like phishing, SQL injection, network scanning, and password-cracking demonstrations.
- Used Kali Linux, Wireshark, and Nmap for demonstrating security concepts.

Built an AI-Powered MCP Tool - Claude 

Tech Stack: Python, Claude API, Model Context Protocol (MCP), Generative AI/LLMs.

Goal: To build useful AI-powered tools using the MCP and improve AI interaction with external services.

- The MCP tool connects AI with external tools such as weather services and file operations.
- It allows AI to perform tasks like checking weather and reading or writing files.
- It improves AI capabilities by providing controlled access to useful tools and resources.

SKILLS

Technical Skills

- Programming Languages:** Java, C, Python, MySQL
- GenAI:** LLM, Prompt Engineering, RAG, Langchain, MCP
- Frontend:** HTML, CSS, JavaScript, React.js, Angular.js
- Backend:** Node.js, FastAPI, Supabase
- Cybersecurity Tools:** Kali Linux, Wireshark, Nmap
- Tools:** VS Code, Git, GitHub, Antigravity

Non technical Skills

- Problem Solving
- Communication
- Leadership
- Adaptability
- Time Management

CERTIFICATES

- Internship Completion Full stack development 
- Cyber Hygiene Practice - Appreciation Letter 
- COFPS - Certification 
- Guvi certification - Ethical Hacking
